

Leads to the Application for a Master Thesis

- You may apply for your master thesis six weeks at the earliest and two weeks at the latest before starting, the date of receipt in the examination office being decisive.
- The delay for the module “master thesis” starts at the earliest one day after the examinations office has officially assigned the topic. The module lasts six months.
- Submitting your application you have to provide proof of at least 79 CP, which means the module current concepts as well as the module methods are to be concluded.

- Internal Master Thesis:

The tutors and revisers should be lecturers who take part in the masters degree programme Interdisciplinary Neuroscience. For details see § 20 of the Study Regulations for INS.

- External Master Thesis

If you want to execute an external master thesis, you to preliminarily submit an exposé to the chairperson of the Board of Examinations.

For details see *External Modules INS*.

The second reviewer has to be a professor taking part in the master programme INS.

Please note: If it can be proved that substantial parts of the results presented in the master's thesis have been achieved before the official application they MAY NOT be subject to the survey.

- The examinations office requires 3 bound copies of the master thesis. Also, you have to add and sign the following declaration:

I hereby confirm that I wrote this submitted master thesis myself without using any help besides the referenced sources and material. In every case where I have derived the words or meaning from other work, I have clearly indicated the source. The thesis or parts of it have not been published for either this or any other degree as examination material. I have received no remuneration for the scientific work performed in the context of this master thesis.

Thus I confirm that I carried out my scientific work according to the principles of good scientific practice.

On the whole it's the official regulations of this master course, i.e. Ordnung des Fachbereichs Biowissenschaften der Johann Wolfgang Goethe-Universität Frankfurt am Main für den Masterstudiengang Interdisciplinary Neuroscience, version of June 11, 2015 and its amendments that prevail.

Frankfurt, August 10, 2016
