Brief description of the available funding measures

**Strategic meetings, exchange of university administrators/coordinators**

To help intensify the partnership, executive-level university staff who wish to attend strategic meetings with their partners may apply for funding to cover the cost of travel and accommodation abroad (for up to eight days. See details provided in the funding guidelines, sect. V). These meetings may take place either at the German university or the foreign university (or universities). The same applies to the exchange of university administrators and/or coordinators.

**Workshops**

To facilitate personal academic exchange of institute- or department-level students and staff at the partner universities, funding for travel and accommodation expenses (for up to eight days) is available to students and lecturers who wish to participate in joint workshops at the German and/or partner university (or universities). See details provided in the funding guidelines, sect. V.

**Summer schools**

The partner universities may offer a two- to four-week summer school to acquaint young German and foreign academics, graduates or undergraduates with their teaching and research facilities and offer them academic training in current fields of research.

Funding is only granted to Germans attending a summer school at one of the foreign partner universities and to foreign students and lecturers attending a summer school at the German partner university.

**Short-term visits and guest lectures**

Funding is available to finance individual guest lectures (e.g. lecture blocks lasting at least two weeks) for foreign professors who accept a short-term teaching assignment at the German university, or for short-term visits by German professors at the foreign university (or universities). The visiting lecturers are required to have extensive teaching experience as well as sufficient academic qualification (minimum condition is a doctoral degree or equivalent doctoral-level qualification). The artistic qualification is the determining factor in the areas of Art and Music. Visiting lecturers are eligible to receive funding for travel and accommodation expenses. Domestic salary and employment benefits have no effect on the calculation.

**Study and research visits for students, graduates and junior researchers**

Funding is available to finance travel and accommodation expenses for up to six months (see funding guidelines).

**Personnel expenses for managing the partnership(s)**

Funding for one full-time management position, as well as part-time positions for student and/or research assistants is available to cover personnel expenses tied to the management of the partnership(s). In programme line A, the management position can be created within
the scope of the university administration. In programme line B, it is possible to finance the position within an institute or department.

**Conference participation**

For Germans who wish to participate at conferences (only in the countries of the partner universities) and foreigners who would like to do likewise (at conferences only in Germany), funding is available to cover travel and accommodation expenses, as well as conference fees. The latter is calculated according to the actual cost.

**Expenditures for joint academic publications**

Funding of up to € 10,000 annually can be granted to cover the cost of joint academic publications. Additional funding is available in exceptional cases.

**Non-personal funding (Sachmittel) for advertising measures, materials, etc.**

Funding of up to € 10,000 annually is available to cover the cost of non-personal funding for advertising measures, materials, etc. Additional funding can be granted in exceptional cases, but requires special justification.

Funding for material resources can apply, e.g. to expenses for starting a website for the Strategic Partnerships or Thematic Networks, for producing and printing brochures and flyers, teaching and learning materials, for temporary employment of assistants needed for staging larger events and fees for external experts (up to € 250/day).
