Working in the Industry - What’s Needed and How to Get There

🌟 **Objective**

For those working in academia, there might be limited insights into the working environment in industry. We would like to offer a first-hand look at working in a large multinational company. The objective is for you to understand how industry works and allow you to decide if this is an attractive route for you.

🔍 **Description**

If so, there are many things that are in your area of influence while looking for a job after your PhD.

This seminar gives you an opportunity to get a structured view of the different steps. It will give you pragmatic examples of some dos and don’ts in the process. We will be taking you through the different process steps.

- Know what you want
- Know what your strengths are
- Define which skills you can leverage
- How to use/build your network
- Understand what they need
- Tailor your communication to them
- Prepare for the interview
- Tips for a successful start in a company

💡 **Methodology**

The workshop is intended to be a mix of expert input through presentations in combination with exercises and discussions. Some pre-work will be sent out prior to the training session.
