Scientific Career in Germany
in cooperation with Career Service

**Objective**

This half-day workshop aims at giving the participants an overview over current trends in the research system in Germany and Europe as well as on funding opportunities for research career development. It will provide the participants with basic knowledge and competencies for the development of grant applications for funding bodies and offers insights into the objectives and practices of research funding institutions and peer review procedures.

**Description**

The workshop will start with a talk by the trainer, followed by a discussion.

The talk will cover the following topics:

- The research system in Germany and Europe
- Typology of research funding and career development schemes
- Basics of writing a grant proposal
- Criteria and perspectives of peer review in grant application procedures
