

Successful Networking

Description

This workshop shows what makes up a successful networking in science and how important it is for Early Career Researchers. In addition, the workshop serves to analyze the current and future network of the participants.

Content in detail:

- What is networking and what is not? Definition & limits of a network
- Networking as a career opportunity for Early Career Researchers aware of research about network & career and impact on career development
- Network analysis: current status & future with respect to career aims
- Main steps in networking (4 Point Model), methods & tools, Do's & Don'ts
- Interactive exercise on the topic of "Initial contact" (e.g. at conferences)

Methodology

- Presentation with theory on the topic (hand-out will be provided)
- interactive exercise & individual practical work
- discussion in the group and feedback from the trainer
- room for exchange and questions

Conditions

Openness and active participation in the workshop.

Trainer

Susanne Matuschek
MATUSCHEK CONSULTING,
St. Gallen

From 2003 - 2011 Susanne Matuschek was Program Manager at the Swiss National Science Foundation (SNSF) in the Career Division, responsible for two funding programs. 2007-2010 she chaired two European working groups, "Conditions of a research career in Europe" and "Gender Issues" ("Research Careers in Europe – Landscape and Horizons").
