Working in the Industry - What’s Needed and How to Get There

Objective
For those working in academia, there might be limited insights into the working environment in industry. We would like to offer a first-hand look at working in a large multinational company. The objective is for you to understand how industry works and to allow you to decide if this is an attractive route for you.

Description
There are many things that are in your area of influence while looking for a job after your PhD.
This seminar gives you an opportunity to get a structured view of the different steps. It will give you pragmatic examples of some Dos and Don’ts in the process.

We will take you through the different process steps:
- Know what you want
- Know what your strengths are
- Define which skills you can leverage
- How to build/use your network
- Understand what they need
- Tailor your communication to them
- Prepare for the interview
- Tips for a successful start in a company

Methodology
The workshop is intended to be a mix of expert input through presentations in combination with exercises and discussions. Some pre-work will be sent out prior to the training session.
