

Goethe University Frankfurt am Main invites applications for the position of

Professor (W3) of Educational Psychology with a focus on digitally supported education involving artificial intelligence

at the Institute of Psychology in the Department of Educational Psychology at the Faculty of Psychology and Sports Sciences. This civil servant or public employee position will start as soon as possible.

You will represent the area of Educational Psychology, with a focus on digitally supported education involving artificial intelligence, in research and teaching at the Institute of Psychology, Department of Educational Psychology, and you will take a central position in the development of the planned interdisciplinary study program "AI and Digital Technologies in Learning and Instruction".

We are looking for a person whose focus is on digitally supported education, including artificial intelligence, in research and development, who can document this through internationally visible achievements, and who successfully uses corresponding arrangements in various types of university courses. Involvement in an international research and development network of digital technologies and artificial intelligence in learning and instruction is desirable.

Teaching experience in both psychology (Bachelor and/or Master) and teacher training is desired. Because the professorship is involved in teacher training, candidates are required to have specific experience in this area and should be willing to participate in interdisciplinary initiatives in the field of empirical educational research.

In addition to a PhD and habilitation (or equivalent scientific achievements), we expect that you have experience in academic self-administration in the area of teaching, especially in the development of new study programs. Experience and success in the field of technology transfer are advantageous.

We expect the successful acquisition of competitive third-party funding and international publications. The Department of Educational Psychology aims to attract further interdisciplinary, collaborative research projects. Previous experience with collaborative research as a project leader is therefore an advantage.

The Department of Psychology embraces the values of open science and strives for transparent, open, and reproducible research. Applicants are asked to describe in what way they already pursued and plan to pursue these goals.

The formal hiring requirements are defined in sections 67, and 68 of the Hessian Higher Education Act (Hessisches Hochschulgesetz).

Goethe University is an equal opportunity employer, committed to diversity and inclusion. In particular, we are welcoming applications by qualified women and people with a migrant background. At Goethe University, a special emphasis is placed on creating and sustaining a family-friendly work and research environment. Where applicants are otherwise equally qualified, preference is given to candidates with disabilities or equivalent. The same applies to women in fields in which they are under-represented.

To apply, please send a CV (academic and professional career), an overview of your teaching activities as well as a collection of recent course evaluations, concepts of two of your own higher education courses involving digital technologies and/or artificial intelligence, a list of publications (copies of publications on request only), overview of third-party funding you have obtained as well as transcripts (copies) as a single PDF document by 04 August 2022 to Prof. Dr. Sonja Rohmann, Dean of the Faculty of Psychology and Sports Sciences of Goethe University Frankfurt, Theodor W.-Adorno-Platz 6, 60323 Frankfurt am Main, Germany, email: dekanat.fb05@em.uni-frankfurt.de. If you have any questions, please contact Prof. Dr. Andreas Frey at frey@psych.uni-frankfurt.de.
