

The Faculty of Medicine of the Goethe University Frankfurt am Main and the University Hospital Frankfurt, Center of Radiology, invites applications for the following position as civil servant or public employee, as of October 1st, 2023:

Professor (W3) for Nuclear Medicine (Successor to Univ.-Prof. Dr. med. Frank Grünwald)

The Professorship is integrated into the Center of Radiology and the Institute of Diagnostic and Interventional Radiology and Nuclear Medicine (Director: Univ.-Prof. Dr. med. Thomas J. Vogl). The successful applicant will overtake the leadership of the „Nuclear Medicine Unit“ at the University Hospital in Frankfurt.

Nuclear medicine is a competence center with tasks in patient care, clinical research and teaching. The interdisciplinary cooperation with colleagues in radiology and all other disciplines of the University Hospital Frankfurt is essential.

The Nuclear Medicine Unit offers all diagnostic and therapeutic nuclear medicine procedures. Two gamma cameras and, in future, two SPECT/CT cameras (including the latest generation of semiconductor technology) are available for diagnostic purposes. The institute has a therapy ward for the implementation of peptide receptor radionuclide therapies, PSMA-ligand therapies and selective internal radiotherapy, as well as a PET/CT center.

We expect applications from a nationally and internationally clinically and scientifically proven personality with high social skills and comprehensive, long-standing clinical expertise in the full range of diagnostic nuclear medicine and innovative therapy methods. In the clinical area, you should intensify the existing cooperation and further develop the network concept of university medicine with other institutes. Experience in clinical leadership, especially in the field of human resources, organization, budget, quality management and clinical supervision are required. We expect your willingness for close cooperation with all clinics and institutes within our University Hospital. We expect applicants to actively integrate into existing research structures and research profile of the medical faculty. In particular, scientific cooperation to strengthen collaborative research, such as the collaborative research areas (Sonderforschungsbereiche) and the excellence initiatives of our University Hospital, is desired.

In addition we are looking for a personality with special interest in teaching using innovative and practice-oriented teaching concepts and in the implementation of the new licensing regulations for doctors (Approbationsordnung). Thus, we expect extensive, documented experience in teaching medical students.

Prerequisites for the application are a completed university degree in human medicine, doctorate, habilitation or proof of equivalent scientific achievements, which may also have been achieved as part of a junior professorship or outside the university sector, a Board certification in Nuclear Medicine (Facharzt für Nuklearmedizin), teaching experience, peer-reviewed third-party funds (DFG, BMBF or similar) as well as outstanding scientific publications.

The health care duties associated with the professorship are governed by a separate contract of employment on performance-based compensation with fixed and variable components.

The formal hiring requirements are defined in sections 67 and 68 of the Hessian Higher Education Act (Hessisches Hochschulgesetz).

Goethe University is an equal opportunity employer, committed to diversity and inclusion. In particular, we are welcoming applications by qualified women and people with a migrant background. At Goethe University, a special emphasis is placed on creating and sustaining a family-friendly work and research environment. Where applicants are otherwise equally qualified, preference is given to candidates with disabilities or equivalent. The same applies to women in fields in which they are under-represented.

To apply, please send a CV, a list of publications, an overview of your research and teaching activities as well as transcripts and course evaluations as a single PDF document according to the faculty guidelines (<http://www.uni-frankfurt.de/60005087/berufungen>) by 19th September 2022 to the Dean of the Medical Faculty: Bewerbungen-Professur11@kgu.de. If you have any questions, please contact Univ.-Prof. Dr. med. Thomas J. Vogl. Further information about the appointment process, the legal framework and data protection: <https://www.vakante-professuren.uni-frankfurt.de>. Application documents will not be returned after the procedure has been completed.
