

Slides, Rhetorics and Interactions: What Makes a Good Presentation?

Objective

In this online workshop you will learn how to give good scientific presentations online and offline

Description

- Setting analysis: to whom will you speak and under what conditions?
- How will this affect your presentation?
 - Structure and story of your presentation
 - Slide design, not decoration
 - Stage fright and how to enjoy the adrenaline
- Rhetorics
- Your own presentation: incorporate what you have learned and get feedback
- Q&A sessions
- Presenting online: What can you gain from this format?
- Prepare the stage: sound and light, table height, camera, background and how you look good online
- A professional (first) impression: online vs. offline
- What will change for your presentation in this new medium?
- Connect to and activate the audience
- The right energy level: Why is it different online than offline?
- Video conferencing etiquette: speaking up, taking turns, time delays

Methodology

We use live webinars, in which short presentation phases alternate with individual and group work.

Between the webinars and afterwards, there is the opportunity to deepen the content on our learning platform at your own pace.

There is an opportunity for individual feedback on your own presentation from the course leader.

Conditions

To participate you need a computer with a camera and microphone. The commercial-available built-in versions are sufficient for the workshop.

Organizational Information

Language / Format	English / Online
Target group	Doctoral Candidates at all stages and Postdocs from all faculties
Date	Monday- Wednesday, 14-16 November 2022, 9:00 – 11:30
Registration	For registration click here

Trainer

Dr. Philipp Gramlich
NaturalScience.Careers,
Oosterbeek (Niederlande)

He has studied and researched chemistry (>2800 citations, Google Scholar 2021) at five universities in Germany, Australia and Scotland. He gained experience in industry, first at baseclick, a biotechnology start-up and later at Eurofins Genomics as Teamleader R&D, QC and Analytics, being responsible for up to 22 staff. Since 2016, he is fully focusing on his work as co-founder of NaturalScience.Careers. He specializes in seminars and talks about career development, leadership and presentation skills. Since 2016, he regularly writes career columns for "Nachrichten aus der Chemie".
