Description

Writing a paper in your field of research, finding the appropriate journal and finally getting your paper published requires a very specific knowledge of the writing and publication process in your discipline.

This online workshop will give participants an introduction into the following topics:

- Journal selection
- Process of submission
- Dealing with editor's feedback

This workshop is a complementary module to our general workshop program on scientific writing. We strongly recommend attending one of those workshops to obtain an extended knowledge of academic writing and publishing.

This workshop is planned as a face-to-face event. However, we reserve the right to switch the format at short notice according to the then relevant pandemic regulations. Participants will be informed accordingly.
