Preface XIII

1 Knowledge, Learning, and Regional Development: An Introduction
   Eike W. Schamp and Vivien Lo 1

2 Regional Innovation Systems, Market Structure and Embeddedness:
   The Transformation of Regional Economic Configurations
   Ron Boschma, Jan Lamberts and Veronique Schudens 13

3 Propinquity Without Community
   Spatial Transfer of Knowledge in the Netherlands:
   A National and International Comparison of Collective Learning
   in High-Tech Manufacturing and Services
   Erik Stam and Egbert Wever 39

4 Local Codes and Global Networks:
   Knowledge Access as a Location Factor in the Financial Industry
   Vivien Lo 61

5 Regional Development and the Role of Company-Provided Training
   Jouke van Dijk and Sebastiaan Bosch 83

6 ‘Learning’ in Automobile Components Supply Companies:
   The Maquiladora of Ciudad Juárez, Mexico
   Martina Fuchs 107

7 Restructuring Knowledge Acquisition and Production
   in the Pharmaceutical and Biotech Industries
   Christian Zeller 131

8 Closing the Gap Between Knowledge Creation and
   Knowledge Use: Policies for Biotechnology in the Netherlands
   Marina van Geenhuizen 167
Tables and Figures

Tables

Chapter 3
1 Research regions, with international comparison 44
2 The sample of high-technology SMEs 45
3 Origin of research personnel 47
4 Firm origin 52
5 Cooperation with incubator 53
6 New business start-ups by former employees 54
7 Innovative cooperation with regional customers and suppliers, by origin of the firm 55
8 Innovative cooperation with regional customers and suppliers, by origin of the incubator 55

Chapter 4
1 League table of M&A financial advisors in Germany 70
2 Location factors of M&A services 73

Chapter 5
1 Reasons why vacancies remain unfilled for long periods 91
2 Positions for which industrial companies expect staffing problems in the coming year 92
3 Percentage of firms reporting that their employees have sufficient training for their jobs 93
4 Percentage of firms reporting changes in the content of jobs in the last two years 94
5 Reasons for changes in job content 93
6 Percentage of firms reporting that additional training is needed for the next two years by type of training 97

Chapter 7
1 Five dimensions of international technological expansion of MNC 134
2 Collaborations of Novartis (incl. Ciba-Geigy, Sandoz) with biotech companies in the region of Boston and Massachusetts 147
3 Collaborations of Novartis (incl. Ciba-Geigy, Sandoz) with biotech companies in the Bay Area 149
4 Collaborations of Novartis (incl. Ciba-Geigy, Sandoz) with biotech companies in San Diego / La Jolla 151
5 Collaborations of Novartis (incl. Ciba-Geigy, Sandoz) with biotech companies in the region of Basel, Upper Rhine Valley and Switzerland 152

Figures

Chapter 2
1 Determinants of regional economic growth and transformation 15
2 Pre-conditions for the definition of different local systems 31

Chapter 3
1 Valuation of the regional labour market for skilled personnel 47
2 The importance of informal channels for the recruitment of skilled personnel 48
3 The importance of external partners for innovative activities 49
4 The importance of external partners (customers and suppliers) within and outside the region for innovative activities 50
5 The geographical origin of important customers and suppliers for innovation in manufacturing SMEs in Southeast Brabant 51
6 Origin of spin-offs 53

Chapter 4
1 Code accessibility 67
2 Temporary network for the production of M&A services 68
3 Merger & Acquisitions advisors in Frankfurt 71

Chapter 5
1 Development in employment opportunities 90
2 Vacancies in companies 91
3 Staff participation in training activities 95
4 Relationship between changes in jobs and participation in training activities 98
5 Relationship between adequacy of staff's training and participation in training activities 99
6 Relationship between unfilled vacancies and participation in training activities 100
7 Relationship between employment growth and participation in training activities 100
Chapter 6
1 Learning processes in plants of a region 109
2 Governance by global value chains and by hierarchy 110
   in transnational corporations, and regional governance
3 Employment in maquiladora industries along 115
   the US-Mexican border

Chapter 7
1 Novartis' centres of excellence, other research centres 142
   and genomics network in 2000
2 Innovation arenas, hubs and nodes: 159
   Oligopolistic rivals A, B, C with their headquarters
   and most important research centres, biotech companies
   and their innovation relations

Contributors

Sebastiaan Bosch is Researcher at the Activa Research Group, Enschede, the
Netherlands, which does research on labour market issues, urban economics,
and employment creation for a broad variety of regional, national and
international institutions and governments.

Ron Boschma is Associate Professor of Economic Geography, Faculty of
Geographical Sciences, University of Utrecht, the Netherlands. He has worked
mainly on applications of evolutionary thinking in the field of economic
geography. Moreover, he has been involved in studies on the functioning of
(regional) innovation systems, and the economic impact of social capital on the
regional level.

Jouke van Dijk is Professor of Regional Labour Market Analysis, Faculty of
Spatial Sciences, Department of Economic Geography, University of
Groningen, the Netherlands. His main field of research deals with issues such
as regional development and growth, regional and labour market policy,
sectoral and functional changes in employment and production, innovation
potential and performance, the locational behaviour of firms and individuals
and the demography of firms.

Martina Fuchs is Professor of Economic Geography, University of Lüneburg,
Germany. Her areas of interest are the global division of labour, competences,
and the governance of global production chains, particularly in the automotive
industry, both in Germany and Mexico. Recent publications on this topic
include “The Effects of the Crisis of 1994/95 on the Mexican Labour Market”,
Urban Studies 38 (10).

Marina van Geenhuizen is Associate Professor, Faculty of Technology, Policy
and Management, Delft University of Technology, the Netherlands. Her
research focus is on theory and practice of innovation of firms in a regional
context. She has a special interest in biotechnology and new information and
communication technology. Other focuses in her research include the theory
and practice of transport and communication systems. Whatever the focus,
significant attention is being paid to policy analysis and policy-making. Her
current research on biotechnology and new firm formation in the Netherlands
will also be published in Environment and Planning C. She is co-author of
Innovation and Regional Development in the Network Society (Quorum Books,
2002).
Jan G. Lambooij is Professor of Regional Economics, Faculty of Geographical Sciences, University of Utrecht, the Netherlands, and Professor of Regional Economics, University of Amsterdam, the Netherlands. His recent work focuses on evolutionary economics and on the relation of knowledge and learning to regional economic growth. Currently he is involved in a book on evolutionary economics (together with Ron Boschma and Koen Franken).

Vivien Lo is Assistant Researcher of Economic Geography, Goethe University, Frankfurt am Main, Germany. Her main research interests concern the management of knowledge and the organisation of networks with a focus on the service sector. She is currently working on questions about the significance of proximity and institutions for inter-firm relations, and the spatial organisation of financial actors. Recent publications include the co-authored article "A value chain approach to financial centers", TEG Journal of Economic and Social Geography 93 (4).

Eike W. Schamp is Professor of Economic Geography, Faculty of Geosciences and Geography, Goethe University, Frankfurt am Main, Germany. Among his on-going research interests are studies on networks of production, both in manufacturing and services, and on knowledge systems in an institutional perspective. He recently published Vernetzte Produktion: Eine Industriegrenzgeographie in institutioneller Perspektive (Wissenschaftliche Buchgesellschaft, 2000).

Veronique A.J.M. Schuitjes is Assistant Professor of Economic Geography, Faculty of Geographical Sciences, University of Utrecht, the Netherlands. She is working on evolutionary economics from a firm-based perspective. Her main research is about innovation, development, spatial strategies and spatial networks of firms during their life-course.

Erik Stam is a Ph.D. Researcher, Department of Economic Geography, Faculty of Geographical Sciences, University of Utrecht and Assistant Professor of Strategy and Organisation, Faculty of Economics and Business Administration, Free University, Amsterdam, the Netherlands. His research activities are mainly focussed on entrepreneurship, learning, innovation and regional development. His published articles on these themes have appeared in such journals as Regional Studies, Economic and Industrial Democracy, and Small Business Economics.

Egbert Wever is Professor of Economic Geography and International Economics, Faculty of Geographical Sciences, University of Utrecht, the Netherlands. His main research is focused on the relation between the firm and its environment. At the moment he is finishing a book about the economic development of one of the Dutch provinces. He is also author of a number of publications in the field of firm formation.

Christian Zeller is a post-doc Research Assistant and Lecturer on Economic Geography, University of Berne, Switzerland. His research deals with industrial restructuring processes, changing labour relations and the spatial organisation of innovation processes in biotechnology. His current research focuses on scales and governance of innovation relations in biotechnology in a finance-driven accumulation regime. He is author of Globalisierungsstrategien - Der Weg von Novartis (Springer, 2001).
