

# GRADE Sustain LECTURE SERIES

GRADE invites all PhD students and post-docs interested in sustainability research to a lecture series of the GRADE Centre Sustain. Once a month, a senior scientist from the natural sciences, social sciences or humanities at Goethe University Frankfurt will provide you with fascinating insights into his or her research on the topic sustainability. Following the lecture, you can establish contacts with other participants in a relaxed and interdisciplinary atmosphere.

The lecture series will usually take place once a month from 5 to 7 p.m. at GRADE (Campus Bockenheim). We kindly ask all participants to register online in advance for each individual event. GRADE membership is not necessary for registration.
