

Academic Paper Writing for Natural and Life Sciences

Trainer

Dr. Christina Schütte
ProScincia
Beratungs-GmbH, Lübeck

Co-founder and senior consultant, specialized in grant writing, scientific writing, presentation and scientific project management. Active as an evaluator for the European Commission within the Marie Skłodowska-Curie funding program.

Objective

Participants will:

- learn the principles of publication layout,
- learn about presenting results and designing figures,
- get introduced to general writing techniques,
- individually write and improve text and a figure based on their own results,
- learn to review texts and give feedback to others.

Description

The online workshop is designed to give participants an overview on the process of producing a scientific publication, including intensive exercises which are based on the own results of the participants. To assure this, participants will be asked to prepare a figure and figure legend and a short text describing the figure in preparation to the workshop.

The workshop includes a theoretical introduction into the structure of scientific publications and principles of writing readable texts in English, which is enhanced and consolidated by the personal writing experience in exercises and by individual feedback. In addition, strategies for paper writing will be introduced and practiced. This highly interactive approach ensures a lasting enhancement of the writing skills of the participants.

Methodology

The workshop will be provided as a web-based live seminar via Zoom. The workshop structure is adapted to the needs and challenges of online teaching and learning and has thus been split into three days.

Organizational Information

Language	English
Target group	Doctoral Candidates at all stages from Natural and Life Sciences
Date	Tuesday-Thursday, 19-21 January 2021, 9:00 – 14:00
Registration	For registration click here
